

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	$L(h, k)$ -labelling problem . . . . .	1
1.2	Some preliminaries on graphs . . . . .	4
1.3	Fuzzy graphs and basic terminologies . . . . .	9
1.3.1	Interval-valued fuzzy graph . . . . .	10
1.3.2	$m$ -polar fuzzy graph . . . . .	11
1.4	Review of literature . . . . .	12
1.5	Motivation . . . . .	13
1.6	A brief summary of the thesis . . . . .	13
1.7	A Summary . . . . .	15
<b>2</b>	<b>Maximum cardinality <math>K</math>-<math>L(2, 1)</math>-labelling problem on interval graphs</b>	<b>17</b>
2.1	Introduction . . . . .	17
2.2	Interval graph and its properties . . . . .	18
2.3	An algorithm . . . . .	19
2.4	Bound of $L(2, 1)$ -labelling of InvG . . . . .	22
2.5	Holes in $L(2, 1)$ -labelling of InvG . . . . .	24
2.6	A summary . . . . .	26
<b>3</b>	<b>Maximum cardinality <math>r</math>-<math>L(2, 1)</math>-labelling problem on circular-arc graphs and its application</b>	<b>27</b>
3.1	Introduction . . . . .	27
3.2	Circular-arc graph . . . . .	28
3.3	An algorithm . . . . .	29
3.4	An application . . . . .	34
3.4.1	An illustration . . . . .	35
3.5	A summary . . . . .	41
<b>4</b>	<b>Cliques and clique covers in interval-valued fuzzy graphs and application</b>	<b>43</b>
4.1	Introduction . . . . .	43
4.2	Preliminaries . . . . .	44
4.2.1	Some definitions . . . . .	47
4.2.2	IVFQs in IVFGs . . . . .	47
4.3	IVFQCs in IVFGs . . . . .	54

---

4.4 Application of IVFQC in mobile networking communication . . . . .	56
4.5 A summary . . . . .	57
<b>5 Energy of interval-valued fuzzy graphs and its application in ecological systems</b>	<b>59</b>
5.1 Introduction . . . . .	59
5.1.1 Review of related work . . . . .	60
5.2 Preliminaries . . . . .	61
5.3 Eigenvalues of interval-valued fuzzy matrices . . . . .	63
5.4 Energy of interval-valued fuzzy graph . . . . .	68
5.5 Application to ecosystem . . . . .	70
5.5.1 Weighted food web and weighted fuzzy graph . . . . .	71
5.5.2 Formation of adjacency matrix . . . . .	71
5.5.3 Measuring energy of the food web . . . . .	73
5.6 A summary . . . . .	73
<b>6 Edge coloring of <math>m</math>-polar fuzzy graph and its application</b>	<b>75</b>
6.1 Introduction . . . . .	75
6.2 Preliminaries . . . . .	75
6.3 Fuzzy coloring . . . . .	76
6.3.1 Method of edge coloring of an $m$ PFG . . . . .	76
6.4 Chromatic index of $m$ -polar fuzzy graph . . . . .	81
6.4.1 Strong chromatic index of edge coloring of an $m$ -polar fuzzy graphs	84
6.5 Application . . . . .	87
6.5.1 Model construction . . . . .	87
6.5.2 Illustration of membership value . . . . .	89
6.5.3 Decision making . . . . .	91
6.6 A summary . . . . .	91
<b>7 Conclusion and scope of further research</b>	<b>93</b>
