(B.Sc Third Semester End Examinations-2022)

PAPER-CC-07P

(PRACTICAL)

Full Marks: 20

Time: 02 Hrs

*The figures in the right hand margin indicate marks
Candidates are required to give their answers in their own words as
far as practicable*

Illustrate the answers wherever necessary

1. Calculate the mean value of the given data and find the number of days having temperature less than the mean value. Draw a histogram and show the modal value of the given data. 2+4+4

Class interval (Temperature in °C)	Frequency (Number of days)
11-15	37
16-20	31
21-25	43
26-30	19
31-35	9
36-40	6
41-45	5

2. Calculate correlation coefficient between the exam score and revision time using suitable method. 5

Exam score	Revision time
94	80.0
98	60.0
71	56.0
75	47.0
71	43.0
68	40.0
73	67.0
57	16.0
59	21.0
65	54.0
67	40.0
60	39.0
60	38.0
45	8.0
61	34.0
50	16.0

3. Laboratory note book and Viva-voce 5
