(p.195) Index of Notable Examples

I have not included every thick concept discussed, such as ELEGANT and FAIR, nor have I included every instance of all the notable examples, such as every instance of CHAIR. However, I have listed some notable discussions and mentions of a number of concepts, and of other examples.

PRO and CON / pro and con is in the general index since the mention and use of these concepts *as* concepts bleeds into discussion of the topic of evaluations with clear positive and negative point.
